

# SAINT-GOBAIN GROUP

One of the top 100 **global innovators** over the last 10 years

Commitment: **carbon neutrality in 2050**

**World or European** leader in most of our businesses

Over **160,000** employees representing more than 110 nationalities

Located in **76** countries

Sales in 2023 **€47.9BN**

Around **900** manufacturing facilities worldwide

## CONSTRUCTION CHEMICALS BUSINESS UNIT

### ORGANIZED BY REGIONS & MARKETS

**Cement Additives**  
World leader

**Concrete Admixtures**  
Number 2 market player

**Specialty Building Materials**  
Established brands

Over **3,000** employees

**41** countries with local setups

**87** plants

**Global sales** footprint

## Drycast solutions for precast

UNIQUE ADMIXTURES PORTFOLIO,  
DISTINCTIVE KNOW-HOW AND SERVICES  
FOR THE PRECAST INDUSTRY

**Saint-Gobain Construction Chemicals • Chryso**  
Saint-Gobain Tower • 12 Place de l'Iris  
92400 Courbevoie • FRANCE  
Tel.: +33 (0)1 41 17 18 19  
[www.chryso.com](http://www.chryso.com)

# The Chryso® range for Drycast concrete is based on an innovative high-tech approach:

**Chryso®**'s new products use the latest generation molecules to achieve unprecedented performance levels.

Our teams are on hand to support and guide you in improving your concrete mix designs, and help you choose the admixture best suited to meet your needs.

## Chryso® Alpha range

Enabling you to improve compaction, productivity and final product properties.

Robustness enhancement

Material diagnostics

Analysis of your requirements and performance

Suitability for your process

## Chryso® Optec range

Specially designed to improve aesthetic, durability and overall performance.

# Blocks

**LATEST-GENERATION COMPACTION AGENT TAILORED TO YOUR PROCESS**

**Savings** on your concrete formulation and manufacturing costs:

Enables binder content optimisation

Helps reduce the compaction energy needed by the manufacturing process

**Greater** production capacity. **Improved** block quality:

Better swipe and cladding quality

Lower scrap rate

Consistent production and dimensional stability

# Pavers

**LATEST-GENERATION DUAL-PURPOSE COMPACTION AND WATER-REPELLENT PRODUCTS**

**Technological innovations** to develop your business. **Savings** on your concrete formulation and manufacturing costs:

Enable binder content optimisation

Reduce curing time

Enhance the granular packing

**Greater** production capacity. **Improved** quality production consistency:

Excellent water-repellency & reduced risk of efflorescence

Reduced CO<sub>2</sub> impact

Higher colour intensity

Lower scrap rate

# Kerbs

**COMPACTION AGENTS INCREASING STRENGTH AND TAILORED TO YOUR PROCESS**

**Savings** on your concrete formulation and manufacturing costs:

Enable binder content optimisation

Reduced curing time

Reduced manufacturing time

**Greater** production capacity. **Improved** quality and reliability of your kerbs:

Reduced CO<sub>2</sub> impact

Greater surface finishing  
Reduced risk of efflorescence

Higher compressive & flexural strength

Lower scrap rate

# Pipes

**COMPACTION AGENTS INCREASING STRENGTH AND TAILORED TO YOUR PROCESS**

**Savings** on your concrete formulation and manufacturing costs:

Enable binder content optimisation

Reduced curing time

Reduced manufacturing time

**Greater** production capacity. **Improved** quality and reliability of your pipes:

Greater strength

Greater surface finish

Reduced risk of cracking and lower scrap rate

Excellent water-tightness performance

# Hollow core slabs

**COMPACTION AGENTS FOR STRENGTH ENHANCEMENT AND PROCESS OPTIMISATION**

**Savings** on your concrete formulation and manufacturing costs:

Enable binder content optimisation

Reduced heat curing time

Reduced manufacturing time

**Improved quality and reliability** of your slabs:

Greater strength

Reduced CO<sub>2</sub> impact

Reduced risk of cracking and lower scrap rate
