

# Move directly to the tiling space without grinding

# Chryso®CLAW technology

Introducing the Chryso®Screed CLAW 20 last generation additive for grinding free high performance screed.

Eliminates surface laitance & increases surface adhesiveness.

Innovative and patent pending technology.

**Eliminates surface grinding** operation = time savings, cost reduction and dust free environment.

High performance additive for Chryso®Cemfloor and Chryso®Mobicem flowable screeds.

Enhances shrinkage control thanks to internal curing performance and SRA booster effect.

Time saving and performance proven: over 2 million m<sup>2</sup> successfully completed, without curing agent or surface grinding.

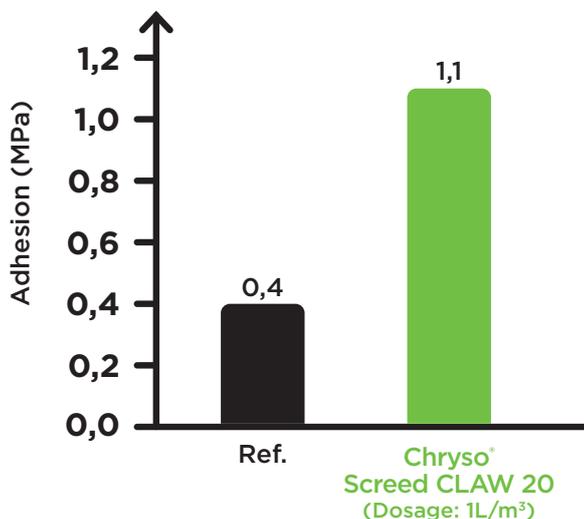

Easy to use: One liter per cubic meter during screed batching.

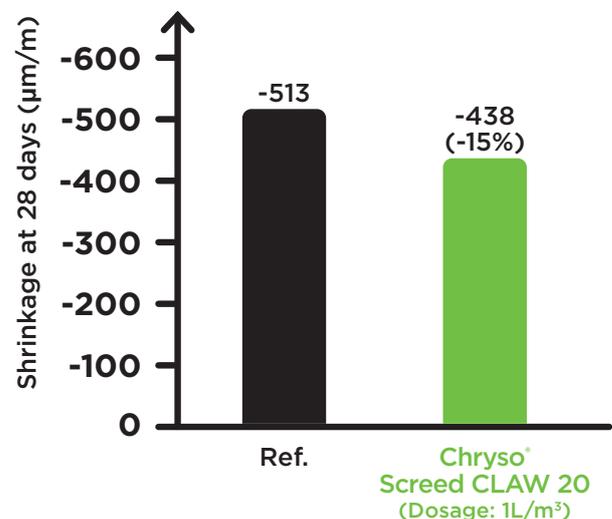

## Laboratory tests

*performed in-house*

### PULL OUT TEST

### SHRINKAGE MEASUREMENT
